**Subject:** Questions about 105/103 grants

Hi Angie,

I have a few grant related questions for you that are somewhat all over!

First, we are working with Lake County to try to get them a continuous PM10 and PM2.5 monitor to replace their FRM instrument. We can fund the PM2.5 through 103 grants, but we are looking at the possibility to fund the PM10 instrument through 105 grants. Do you think this could work as a pass through on the CARB 105 grant?

Also related to the CARB 105 grants, they are using Battelle's contract for the NATTS analysis, but cannot contract with Battelle because of state policy. We are wondering if it would be possible to do a hold back of ~\$7000 from their 105 grant in order to fund this contract. OAQPS is also looking into this possibility through this funding mechanism, but I wanted to loop you in (or the relevant grants team member) that this is something being discussed.

Finally, related to ARP funding and 103 grant funding: Do you know who we include as CC's on the Please Apply letters to agencies within the CARB PQAO? I'm guessing the agency contacts and CAPCOA, and maybe CARB? We are wanting to make sure we follow the same notification for the initial announcement about ARP direct awards.

Thanks! I hope you have/had a great weekend!  
Julia
